

MERGERS & ACQUISITIONS

As hospitals and health systems face the pressures associated with health care reform and turbulent financial markets, many are choosing to align themselves with larger, more stable systems. It is in this context that our Health Care Mergers & Acquisitions Section assists many clients, from the county hospital considering its affiliation options to the multi-state health system considering an acquisition opportunity in a new market. Our attorneys can assist with all aspects of these affiliations, including board-level strategic planning, the RFP process, due diligence, the negotiation of transaction terms and the management of the legal and operational transition into the new arrangement.
